

Sirs,

Please do not weaken the Wisconsin No Call List for telemarketers!

Since the our No Call list went into effect we no longer have to worry who may be calling us. Dinnertime is now pleasant as the rest of the evening.

Allowing special interest groups to dictate our way of life is just plain wrong. Here in Wisconsin we have a law that the residents wanted and like, if businesses do not like it, well, it is there problem!

I also do not see where this is an item that the FCC needs to be involved in. The laws enacted for our residents are just that for our residents!

If you look at the items that receive the most complaints it is most always telemarketers.

Please do not change any thing; this is an issue we take to heart!
